

Introduction

The *Middleboro Gazette Index, 1905 - 1909* is a guide to the information contained within the *Middleboro Gazette* during the period January 1905 through December 1909. The information is as it appears in the newspaper and no attempt has been made to verify that the information given in the newspaper is accurate. The focus of the index is on the communities of Middleboro and Lakeville, Massachusetts. News from outside these geographic areas is included only if there is a direct link to these towns, i.e., Phineas T. Barnum and the Little People.

Special notations are used within the index to designate editorials (e), letters (l), tables (t), photographs (p) and illustrations (i). Authors of editorials or letters are cited either within the headline or in parentheses immediately following either (e) or (l).

The often informal nature of reporting presents special challenges to researchers. Additional information about specific businesses, town departments or other concerns can be located under general headlines, i.e., Railroads, Streets, etc.

Names are a particular challenge in a compilation of this kind. Multiple spellings, misspellings and incomplete names are just a few of the hurdles that must be overcome in order to glean every bit of information contained within the pages of the *Gazette*.

For example, Mr. Elnathan W. Wilbur may be cited as any or all of the following:

Wilbur, Elnathan W.
Wilbur, Elnathan
Wilbur, E.W.
Wilbur, E.
Wilbur (Mr)
Wilbur (Captain)

Mr. Wilbur's last name may also be spelled, Wilbor, Wilber, Wilbour or Wilbur. In addition married women were also frequently cited as Mrs. Elnathan Wilbur or simply Mrs. Wilbur. It is advantageous for the researcher to take a broad view when conducting research on individuals.

It is my hope that the *Middleboro Gazette Index, 1905 - 1909* will provide a lasting resource for people researching the history of Middleboro and Lakeville, Massachusetts.
